STP Website Accessibility Guidelines

Please help us increase the accessibility of STP's website by following these guidelines.

- Images should have alt-txt. For photos, only the name of the person needs to be provided in the alt-txt.

- Links should be linked from text, not as stand-alone url; for example, the STP website, instead of https://teachpsych.org.

- Videos should be captioned.

- Documents should follow accessibility best practices (e.g., Microsoft guidelines, Google guidelines).

- Infographics should have an accompanying downloadable text-only pdf.

- The content of pdfs should be tagged to designate the order in which the content should be read by screen readers.

If you need help with any of these tasks, please contact STP's Assistant Executive Director at aed@teachpsych.org.
